## **SWEET SIPS / Blueberry cocktail is a juicy zinger**

We get a kick out of trying less-than-familiar beverages, and we enjoyed the bright, aromatic zing of TrueBlue blueberry-juice cocktail. It contains no artificial flavors or high-fructose corn syrup; instead, it's sweetened with cane sugar.

Note: It's called a ``cocktail" because it contains 25 percent juice, not 100 percent.

Speaking of cocktails, we like the sound of the TrueBluetini: 1 ounce blueberry cocktail, 1 ounce triple sec, ½ ounce amaretto and ½ ounce Cointreau.

Watching your calories? LiteBlue has just 50 per serving. Available locally exclusively at Randalls for about \$5 per 64-ounce jug.
